Technical Specifications

GENERAL

Material	Fenix NTM (anti-fingerprint, super-matte)
Colors	Biela, Antracit, Čierna, Béžová
Layouts	1, 2, 4, 5, 6 buttons

Materials

The outer surface of the switch is characterized by the use of new generation acrylic resins fixed by the electron beam curing process. At first glance, the surfaces attract attention with their super-matte appearance. They are pleasantly soft to the touch and do not leave fingerprints.

- White: Fenix NTM 0032 Bianco Kos, RAL CLASSIC / 9016
- Anthracite: Fenix NTM 0724 Grigio Bromo, RAL CLASSIC / 7012
- Black: Fenix NTM 0720 Nero Ingo, RAL DESIGN / 000 25 00
- Beige: Fenix NTM 0719 Beige Luxor

Installation and Disassembly

Installation: First, secure the installation frame onto the KU installation box, ensuring that the arrow labeled “TOP” points upwards and the ventilation openings are facing downwards. Then, snap the product onto the installation frame by first inserting the hooks on the top of the product into the frame, and then gently pressing to secure the bottom part. **Disassembly:** Insert a narrow flathead screwdriver into the small notch on the hook at the bottom of the installation frame. Gently pry the hook out of its socket and hold it in place with your hand to prevent it from snapping back into its original position. Repeat this process on the hook on the other side, which will release the bottom part of the product, allowing you to remove it completely.
